# Primary Care First (PCF) Support

## Virtual Coaching & Facilitation to Optimize Performance & Total Medicare Payments

CMS' PCF payment model options represent a significant step in Medicare payment for primary care and alternative payment models (APM). Cohort 1 practices have been selected and will begin in January 2021. Cohort 2 applications will follow, with a projected 2022 start. If you are contemplating what future participation may mean for your practice(s), HealthTeamWorks offers decision support, performance improvement, and training assistance.

### PCF Revenue Comparison Calculator

The HealthTeamWorks' PCF Revenue Calculator, available free of charge, has been designed for primary care practices to better understand, prepare for, and ultimately succeed in the PCF program. This tool focuses on revenue forecasting for two CMS payment model options within the Primary Care Initiative: Primary Care First (PCF) and Seriously Ill Population (SIP).

**Cohort 1 practices** in the acceptance phase find the calculator helpful using CMS data provided in recently distributed Practice Projection Reports.

**Cohort 2 candidate practices** find the calculator helpful as they contemplate applying for future participation.

Our team is available to provide a walk-through of the calculator specific to your practice(s).

### Contact Us Today

To access the calculator, for answers to your questions about the payment model, and to discuss performance support
